## SUSTAINABILITY AT FISH KITCHEN 1931

At Fish Kitchen 1931 we are a family owned and operated business who are precedent-setting in our responsibility to sustainable fishing, the seafood industry and the environment. We also strive to be an economic, social and charitable asset to our local community. All our cod and haddock come from sustainable fishing grounds. We use sustainable and traceable seafood. We are always committed to help with environmental issues and as a pledge to this we are continuously reducing our single-use plastic waste to reduce ocean pollution. We actively source local and seasonal produce, and use day boats to support our local fishing community. All our packaging is responsibly sourced and our menus all FSC certified.
